Profile

Results oriented software developer with hands-on experience in both development and data analysis. In the IDF Intelligence Corps, I learned how to make decisions with precision, lead teams, and deliver under pressure.

Technical Skills

Python, C, C++, C#, JavaScript, SQL, HTML, React, Pandas, NumPy, Excel, Problem-solving, Adaptability, Teamwork

Languages

Hebrew (Native)

English (Fluently)

Education

Holon Institute of Technology — B.Sc. in Computer Science (Oct 2021— July 2025)

Relevant Coursework

Core: Algorithms, Operating Systems, Databases, Software Engineering

Electives: FrontEnd Development, BackEnd Development

Key Projects | Holon Institute of Technology

Cyber Security Project - Built a full-stack security demo with secure and vulnerable client/server versions to illustrate common web vulnerabilities (e.g., SQL Injection, XSS) as part of a cybersecurity course project

Cost Manager app - Developed a React + Vite-based cost management web app to track and categorize personal expenses, implementing interactive UI and state management.

NodeJS Project - Implemented a Node.js application showcasing server-side logic and API endpoints

MVP Race Prediction (Machine Learning) - Created a machine learning model pipeline to analyze NBA player data and predict potential MVP candidates, combining data processing and model evaluation.

Experience

IDF, Unit 9910 — 9900 Intelligence Division (2017 — 2020)

Aerial Photography & Intelligence Analyst -

Processed and analyzed intelligence information from aerial and satellite imagery. created intelligence maps and delivered insights to support operational decisions.

Training Leader - Planned and led training programs for soldiers and officers. initiated and managed projects to improve operational workflows. coordinated team schedules and oversaw task execution.

Reserve Duty - From 2023, I completed over 515 days of reserve service in the same unit, serving in a leadership role and managing a sensitive operational field.
